

# SAI ADITHYA BOLLA

## SOC Analyst — Incident Response — Threat Detection — SIEM Monitoring — Log Analysis

☎ +91-9493022379 ✉ [saiadithyabolla@gmail.com](mailto:saiadithyabolla@gmail.com) 🔗 [linkedin.com/in/saiadithyabolla](https://www.linkedin.com/in/saiadithyabolla)

### Summary

---

Cybersecurity Analyst with hands-on experience in Security Operations Center (SOC) environments, specializing in threat detection, incident investigation, security monitoring, and log analysis using Splunk, Microsoft Sentinel, and Microsoft Defender XDR. Skilled in phishing analysis, malware investigation, threat hunting, and incident response, with experience correlating security events across endpoint, network, and cloud environments. Passionate about leveraging threat intelligence and automation to strengthen organizational security posture and improve SOC operational efficiency.

### Skills

---

**Networking & Infrastructure:** DNS, DHCP, TCP/IP, OSI Model, Active Directory, Network Architecture, VPN.

**Core Cybersecurity Skills:** CIA Triad, Ethical Hacking, Web Application Penetration Testing (WAPT), Vulnerability Assessment & Penetration Testing (VAPT), PowerShell.

**Security Monitoring & SOC Operations:** SIEM Monitoring, Incident Response Coordination, SLA-based Incident Handling.

**Threat Analysis and EDR/XDR:** Phishing Analysis, Email Security, Common Cyberattacks, Protocol and Port Analysis, CrowdStrike, Microsoft Defender XDR

**Security Tools & Platforms:** Splunk (Search Processing Language – SPL), Antivirus Solutions, Firewalls, Email Gateways, IDS/IPS, Wazuh, Microsoft Sentinel, ELK Stack, SOAR.

**Malware and Threat Hunting Analysis:** Static & Dynamic Malware Analysis, IOC Extraction, Basic Threat Hunting Techniques, MITRE ATT&CK Mapping, VirusTotal, ANY.RUN, Wireshark.

### Experience

---

#### ER Segment Solutions Private Limited

July 2025 – March 2026

##### *SOC Analyst Intern*

- Assessed and triaged 300–500 daily security alerts using SIEM platforms in a 24/7 SOC environment.
- Investigated and escalated 40+ security alerts, including phishing, malware, and brute-force attacks, ensuring SLA compliance.
- Applied SOC playbooks and incident response SOPs during investigations to maintain standardized handling procedures across 40+ security incidents.
- Reduced false positives by 25% through optimization of Splunk SPL queries and tuning correlation rules for improved alert accuracy.
- Correlated logs across endpoints, network devices, and security tools to investigate 40+ security alerts and accelerate incident escalation workflows.
- Collaborated with L2 analysts on complex threat investigations and root cause analysis, enhancing monitoring coverage and improving escalation efficiency.

#### Bug Hunter - Freelance

February 2024 - Present

##### *WAPT*

*Tools Used: (Burp Suite, OWASP ZAP, Nmap, Shodan, Nuclei.)*

- Performed penetration testing on 10+ web applications, identifying 25+ vulnerabilities including SQL Injection, XSS, and CSRF.
- Reduced security risk by improving remediation recommendations, leading to the closure of 80% of reported vulnerabilities.
- Conducted reconnaissance using Nmap and Shodan across 50+ assets to identify exposed services.

### Projects

---

#### Malware Analysis and Detection

November 2025 – December 2025

- Developed 15+ YARA detection rules for malware family identification, achieving approximately 90% detection accuracy during testing.

- Extracted and analyzed 50+ IOCs using sandbox environments, improving malware classification accuracy and threat intelligence correlation.

### Email Header Analysis and Phishing Investigation

March 2026 – April 2026

- Led a phishing email investigation by analyzing message headers, authentication records, and infrastructure indicators to determine attack legitimacy and assess organizational risk.
- Correlated domain reputation, sender infrastructure, and email artifacts with MITRE ATT&CK techniques to identify Business Email Compromise (BEC) indicators and attack patterns.
- Developed a comprehensive incident report containing technical findings, risk assessment, and response recommendations to support security decision-making.

### SOC Automation Lab

April 2026 – June 2026

- Built an AI-driven Security Operations Center (SOC) pipeline using Splunk Enterprise and n8n to streamline threat detection and incident response workflows.
- Developed and tuned detection queries and orchestrated playbooks for brute-force and SQL injection attacks aligned with adversary TTPs.
- Implemented AI-based alert enrichment using Google Gemini and configured response actions (IP blocking via pfSense firewall) to improve alert triage efficiency.
- Executed log analysis and threat simulation using DVWA and Kali Linux, demonstrating hands-on threat hunting and complete threat lifecycle management.

### Incident Investigation & Threat Hunting — Microsoft Sentinel & Defender XDR

May 2026 – June 2026

- Led a comprehensive investigation of a critical phishing-driven malware incident by correlating email, endpoint, network, and threat intelligence data, enabling the rapid identification of the attack chain and affected assets.
- Assessed organizational exposure through proactive threat hunting, validated indicators of compromise, and escalated findings with actionable recommendations to support containment and incident response efforts.
- Mapped adversary behaviors to the MITRE ATT&CK framework and produced an executive incident report that improved visibility into potential credential theft, lateral movement, and business risk.

## Hands-On Labs

---

### TryHackMe SOC Levels 1 and 2 Labs

February 2026 – May 2026

- Completed SOC Level 1 & 2 labs covering digital forensics, alert triage, and attack investigation scenarios, simulating real-world attacks to identify lateral movement and data exfiltration techniques.
- Detected web application vulnerabilities and analyzed malicious traffic using Wireshark to strengthen defensive security strategies.

## Awards & Certifications

---

- CompTIA CySA+ (Cybersecurity Analyst).
- Certified in Ethical Hacking and Web Application Penetration Testing (WAPT) — ER Segment Solutions.
- Recognized by NCIIPC for responsible disclosure of critical web application vulnerabilities.

## Education

---

### Bachelor of Technology (B.Tech) in Computer Science and Engineering

Graduated: 2025

*Vignana Bharathi Institute of Technology, Ghatkesar, Hyderabad*

*CGPA: 6.5 / 10*
